1 World's Largest Enterprise Implementation

2 Supply Chain Visibility

3 Impact & Significance

4 How do we do it?

5 Q & A

World's Largest Enterprise Implementation

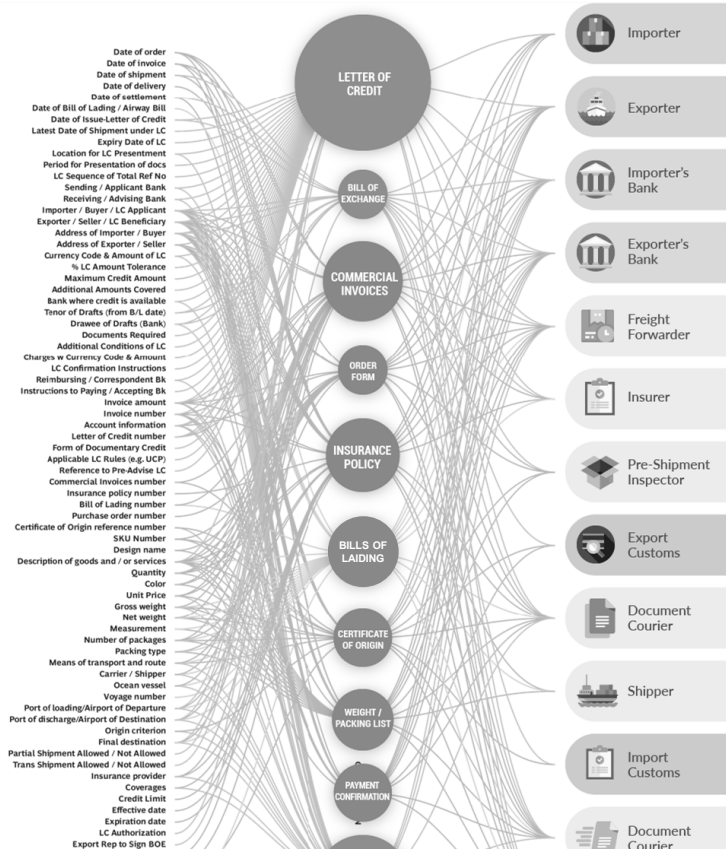

COMPANIES ARE BUILT TO WORK TOGETHER. SYSTEMS ARE NOT.

Systems are disparate and serve the companies that build them.

The inability to synchronize and use all the information that flows creates challenges – up and down every supply chain globally.

Particularly acute in supply chain because of sheer volume and manual processes.

On-platform frictionless financial services / trade finance.

Impact & Significance

VALUE REALIZED FROM DEPLOYING OUR PLATFORM

Expedited access and sharing of accurate information throughout a workflow, in real-time.

- Simultaneous multi-party collaboration
- Accessible to all parties in real-time
- Eliminates duplication - no need for data resubmission
- Identity, compliance and due diligence protocols
- Invoice creation & payments processes
- 3rd party authenticated digital and physical documents
- Seamless integration with legacy systems
- Connects other technology (IOT, AI, BI, etc.)
- Automated proof of delivery
- Real-time / early alerts for missing information
- Eliminates data discrepancies

DLT^{LABS™}

INFORMATION PLATFORM

“The biggest improvement for us is **reduction of manual work** in resolving disputes. The **cost and the waste** associated with chasing dispute resolution has come down dramatically – from 70% to now under 2%. That is from real observations on over 85,000 invoices in the first few months. We are seeing the proof of the waste that can be wrung out of the system.”

“We very quickly saw patterns develop, enabling us to get in front of issues early on and **helping to save millions of dollars in waste**. We also see **opportunities** to tighten up our planning because we can now see our information, through the ledger, all in one place.

The technology brings all this together into one ledger that originally was a payment platform, but **we are using it much more as an information platform to give us insight on how we run our business.**”

John Bayliss

How do we do it?

MODULARITY FOR QUICK TIME TO MARKET

Infinite number of configurable functions

Resulting in significantly faster (10x) time to market and includes out of the box support and lifecycle management.

INDIVIDUAL CARRIER DASHBOARD

DAILY SHIPMENTS

STATUS OF WORKFLOW

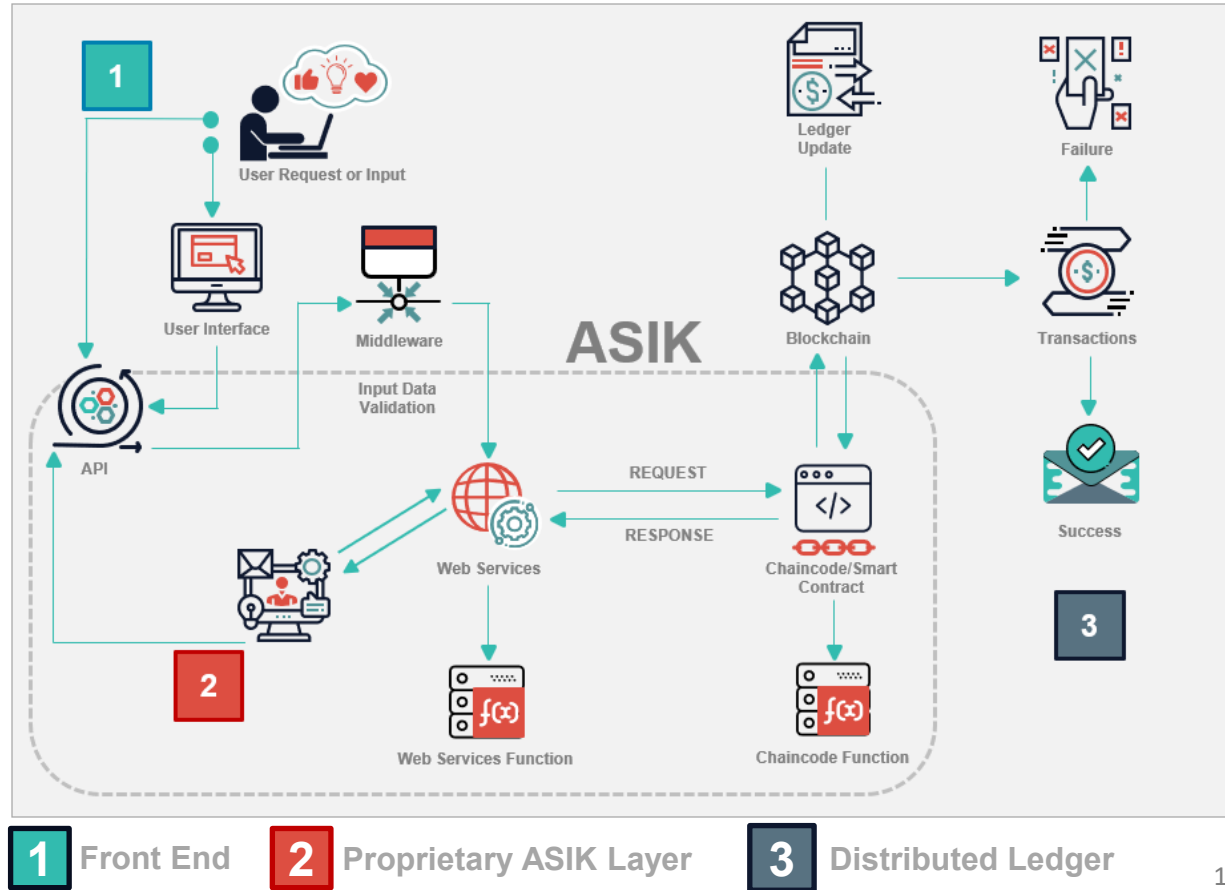

- 10,622 approved invoices (payment process + settled)
- 1,201 invoices in progress (deliveries + disputes + cancelled)

TOTAL SHIPMENTS: 11,823

- Payments processed – 3,879 invoices
 - invoice approved & awaiting payment terms
- Payments settled – 6,743
 - invoice has been paid
- Current open disputes: 197 or 1.7%
- 929 shipments scheduled but not yet delivered / approved

MODULARITY & RE-USABILITY ASSURED BY TECHNICAL INNOVATION

Our platform allows for quick time to market because of its modularity and reusability. All of that is achieved by applying a concept of ASIKS.
